Wainfleet, 11 a.m.
Mayfield Hall, 2:30 p.m.
Subject, "What It Means to Trust in God."
Preacher, Walter G. Jones.

U.F.A. Medicine Hat Federal Convention

Brooks, July 26.—The annual convention of the new Medicine Hat U.F.A. federal constituency was held at Brooks, Wednesday. Approximately 250 attended the meeting which saw representatives from ten districts covering a radius of more than 150 miles. J. D. Rogers, Bindloe, was in the chair.

The convention was opened with short speeches from the following: J. Fowler, Bindloe; J. M. Wheatley, Chancellors; Mrs. McDonald, Wainlet, on organization; Mrs. Ross, vice-president of the U.F.W.A., on the convention at Regina; Mrs. Hepburn, Edmonton, on the need of junior organization; J. C. Buckley, M.L.A., on the need for will power in order to succeed in anything; W. C. Smith, M.L.A., Empress, on the power of the provinces in dealing with limited companies; S. Fraser, Carmanagay, entertained with a few recitations.

After lunch the hall was crowded to capacity to hear R. J. Garland, M.P., for Bow Valley. Mr. Garland in his drive for new C.U.F. memberships outlined the convention recently held at Regina, and explained to the audience the changes proposed by that organization in the governing of the Dominion. The speaker also criticized the splitting up of the Bow Valley district and having it added to Medicine Hat constituency "for the sake of the conservative party."

During the evening session the election of officers took place as follows: President, J. M. Wheatley, Chancellors, vice-president, C. Anderson, Mrs. McDonald, vice president, Mrs. J. D. Rogers.

Farwell Social Evening

A social evening was held in the Sunday School room of the United Church, on Friday evening. The guest of honor was Mrs. F. G. Sanderson, who is leaving in the near future, to make her home at Marwayne, Alberta. The time was spent very enjoyably, light refreshments were served, and the ladies present wished Mrs. Sanderson every success in her new home and surroundings.

Gasoline From Coal

Britain undertakes to make its own gasoline not from oil wells but from coal mines. The hydrogenation method is to be used in extracting motor fuel from the over supply of British coal. Parliament has approved the undertaking and has granted a tariff preference to the Imperial Chemical Industries Ltd., to encourage its investment of more than £2,500,000 in a commercial hydrogenation plant. The operation of this plant alone is expected to give work to 1,000 miners and 7000 others in manufacturing processes. Several nations have been experimenting with gasoline from coal—Britain, however, the secret found, sees a significant industry arising—Chicago St. Monitor.

Mr. and Mrs. J. Stonely, and children, left last week on a holiday vacation to the coast.

Fowler, Bindloe; secretary, R. Umble, Gleichen, assistant. Mrs. L. Elder, Standard; assistant, Mrs. J. M. Wheatley; district 3, W. Pollock, Gen. assist. Mrs. Ben Plimmer; district 4, J. W. Jorgenson, Atlee; district 5, C. Colborne, Tilley; district 6, A. M. Day, Howell; district 7, A. Anderson, Medicine Hat; district 8, H. C. McDonald, Estley; district 9, B. S. Evans, Conroy; district 10, J. D. Mad. Ill. Foremost.

A motion was then carried that the nomination of a candidate be postponed for some time to allow for proper organization.

For Sale

Two Milch Cows, 8 and 3 years old, with calves at side, both milking; \$25 each.—Apply to the Express Express.

Burstall Defeat Empress

The Burstall ball team were visitors to Empress on Friday evening, to play the locals in a league fixture. The second innings was a donkey to the locals and undoubtedly cost them the game as Burstall scored five times in this frame. The final score was 7-4 in favor of Burstall. On the run of the play the teams were fairly evenly matched.

\$500 Health Exam. Fee

Council members of the College of Physicians and Surgeons of Saskatchewan have agreed on \$5 as a reasonable fee for examination of the respective bridegrooms before issuance of a health certificate for marriage. Possession of a clean bill of mental and physical health was made mandatory by the Marriage Act, 1932, passed by the Saskatchewan legislature which went into effect July 1.

Physicians are not bound to charge \$5 for their examination of bridegrooms, but it does draw up a schedule of reasonable fees.

As hard as steel and as light as aluminum, is the claim for hydronium, a new German alloy.

C. F. Boulter Successful In Drumheller Exams.

C. F. Boulter, well known local teacher of piano, reports having recently secured his Associateship of Toronto Conservatory of Music, when examinations were held at Drumheller, July 4th. Mr. Boulter, who last year secured his degree of I.A.B., was very successful in the Toronto Conservatory exams, passing with first-class honors. Mr. Boulter is therefore entitled to the use of A.T.C.M., and is receiving congratulations from many friends throughout the town and district. Mr. and Mrs. Boulter have been holidaying at Acadia Valley—Herald, Hants.

Here and There

Almost 200,000,000 were spent in the manufacture of toilet preparations, soaps and washing compounds in 1932. A recently issued report states that the total value of the former produced was \$2,073,150, and the latter \$11,724,510.

Twenty-five cents of Oregon and British Columbia made the first leg of a 3,000 mile trip to Budapest in the Princess Kathleen, Seattle to Vancouver. They are travelling C.P.R. across Canada to Quebec, whence they will sail for England on the Empress of Britain.

Marika and the Yukon hold their popularity as summer playgrounds indicated by the sizable list of passengers sailing north to carry in Canadian Pacific coastal liners. Many of them are retired business men, but the majority are summer tourists attracted by the rate reductions for senior Alaska travel.

Forty-three years of "active, loyal, and efficient service," with the Canadian Pacific Railway General of Canada was presented the annual closing exercises of the Boys' Farm and Training School, Shawbridge, Que., recently, when the Earl of Beaulieu, accompanied by H. W. Beatty, Chairman and President, Canadian Pacific Railway, attended the school and awarded prizes to graduates.

Douglas Economic Plan

A meeting was held at Acadia Valley on Monday night for the purpose of hearing Doug Abrard speak on the Douglas Economic Plan. Mr. Eberhardt was unable to attend and a Mr. Manning addressed the meeting in his place. The Plan as expounded was listened to intently, and apparently all questions were answered successfully by the speaker. There was a large attendance.

A Weekly Survey Of Grain Conditions

Friday, July 28, 1933. Strengthening after the severe reaction of last week, wheat prices reached their high point on Thursday, but declined again rapidly today with a net loss of 7 cents in the May futures at Winnipeg. Chicago followed a somewhat similar trend although restricted by the limits on daily fluctuations. Contributing to the break today was the strengthening of the American and Canadian dollar in terms of sterling.

Estimates of 1933 wheat production both private and official for 22 European countries indicate a reduction of slightly over 2 per cent compared with the same countries last season, including four countries in Africa, the United States, Mexico, India and Japan, the preliminary estimates for this year total 2,420,526,000 bushels or ten per cent below 1932 production, of 2,690,567,000 bushels, and still further reduced from the 1931 production in those countries of 2,811,639,000 bushels. When the Canadian crop estimates are published another reduction will be shown.

Weather is unsettled in Northern and Eastern Europe where harvesting is now extending. Otherwise conditions are favorable.

On July 15th, Germany revised their grain imports certificate system. Under the new regulations, up to December 31, 1933, wheat may be imported duty free, against equal quantities of wheat exported. Imports of grain during the entire season to replace flour shipments, is permitted duty free, or at a very low rate of duty. The net surplus of imports over exports up to April 30th is considerably less than in the corresponding months a year ago. On July 16th, Italy amended its mixing law, increasing the portion of Italian home grown wheat for milling purposes from 55 per cent to 99 per cent. Sales of Russian wheat are

Sunday School Picnic

On Wednesday afternoon of last week, the United Church held their annual picnic at the grounds on Mr. Longmuir's farm. The day was very hot, which undoubtedly stopped many from attending, but those present found that the shade of the trees made it much cooler than in town. The time was spent by the young ones in soft and hard ball games. Supper was supplied and lemonade and ice cream cones for the young ones. After supper games were run. Mr. Rivers, on behalf of the Sunday School, expressed appreciation to Mr. and Mrs. Longmuir, for use of the grounds, and providing water for drinking and making of tea, etc. in his talk he included a message of introduction to Rev. and Mrs. Law. Al. together, the outing was a pleasant one to young and old present.

reported and those who will appear in clearance from that country later in the season. At present no shipments are reported from Russia or the Balkans.

Australian shipments for the week ending July 30, are estimated at 1,600,000 bushels, 400,000 bushels less than the previous week. A somewhat curtailed movement of wheat from Australia is likely since available supplies are reported to be limited until the new crop is harvested. Crop prospects in New South Wales and Southern Australia continue satisfactory while in Western Australia and Victoria conditions are favorable. The first estimate of wheat acreage shows a decrease of 600,000 acres compared with last year and exactly equals the five year average of 14,500,000 acres.

There were rains yesterday in the Argentine which, although not urgently required, will be of considerable benefit. Shipments from the Argentine were reported at 4,124,000 bushels, a decrease of one-half million bushels from the previous week.

Weather in the spring wheat belts of North America continues as the determining factor in the situation. The Canadian crop during the last few days has been suffering from a severe heat wave which has affected wheat at the critical filling stage. Private reports now indicate an extremely short crop. High temperatures extended from the North-Western States where crops are more advanced. Cutting has begun in the American spring wheat

Catholic Church

Program for August
Empress—Mass 2nd, 3rd and 4th Sundays Mass at 11:15 a.m.
Chancellor—Mass 2nd, 3rd and 4th Sundays at 9:30 a.m.

7:30 p.m., Evensong and Sermon.
3 p.m., Cavendish School, Evensong and sermon.
Rev John P. Horne, vicar.

"There are tangible signs of business and industrial improvement in Canada and the United States," Sir Joseph Stamp, Director of the Bank of Montreal, President of the London, Midland & Great Northern Railway, and one of Britain's leading economists said recently in the Canadian Pacific liner "Empress of Britain" after a short visit to this continent.

Ten Honolulu youths between 14 and 17 years of age arrived on shipments are reported from Russia or the Balkans.

Autumn shipments for the week ending July 30, are estimated at 1,600,000 bushels, 400,000 bushels less than the previous week. A somewhat curtailed movement of wheat from Australia is likely since available supplies are reported to be limited until the new crop is harvested. Crop prospects in New South Wales and Southern Australia continue satisfactory while in Western Australia and Victoria conditions are favorable. The first estimate of wheat acreage shows a decrease of 600,000 acres compared with last year and exactly equals the five year average of 14,500,000 acres.

There were rains yesterday in the Argentine which, although not urgently required, will be of considerable benefit. Shipments from the Argentine were reported at 4,124,000 bushels, a decrease of one-half million bushels from the previous week. Weather in the spring wheat belts of North America continues as the determining factor in the situation. The Canadian crop during the last few days has been suffering from a severe heat wave which has affected wheat at the critical filling stage. Private reports now indicate an extremely short crop. High temperatures extended from the North-Western States where crops are more advanced. Cutting has begun in the American spring wheat

A total of 616,215 persons visited the 18 national parks of Canada in the fiscal year 1932. These great reservations cover an aggregate area of 18,600 square miles. Each has its own attractive characteristics. There are three in British Columbia, one scenic park in Manitoba and one in Saskatchewan; one historic park Nova Scotia and one in New Brunswick; one recreation park in Ontario and two island parks in the Yukon. He went on to Haifa and Lake Louise where he photographed mountain scenery.

Too True

Friend (consoling): Cheer up old man, there's plenty of fish left in the sea.
Irene (after a bad day off-shore): You and it—and I'm the guy who left them there.

Mrs. D. Lush, daughter, and her sister, Miss Isabel Clough-ton, arrived back from a holiday trip, last Thursday.

held and to a limited extent in Manitoba, but the full extent of the damage will only be known when threshing commences.

Soviet Trade Embargo Lifted As British Engineers Are Set Free

London, England.—Great Britain and Soviet Russia had patched up their immediate differences Sunday with the result that the British embargo on Soviet trade was lifted and the two British engineers held in prison at Moscow were released.

The peace agreement was announced Saturday night, July 1, after consultation between Sir John Simon, Secretary for Foreign Affairs, and the Soviet diplomat, Ilya Miesky, ambassador at London, and Maxim Litvinov, foreign commissar.

The embargo on Russian goods coming into British ports was lifted from April 19, the day after the group of British engineers was found guilty by a Moscow court of espionage and sabotage. Three of the British engineers were expelled from Russia but L. C. Thornton and W. L. MacDonald were sentenced to three and two years imprisonment respectively.

Announcement of the Anglo-Soviet agreement was made by the foreign office which declared a short time afterward that Thornton and MacDonald had been released Saturday, July 1, at Moscow.

The London Gazette supplement published a proclamation by the king and council revoking the embargo, effective immediately. A foreign office communiqué said petitions of the British engineers came before the residuum of the executive committee of the Soviet Saturday, and the sentences of the two men were commuted so they could be set at liberty at once.

Lifting of the embargo was officially announced also by the Russian commissary for trade. The announcements said arrangements would be made promptly to resume Anglo-Russian trade negotiations where they were interrupted as a consequence of the arrest of the British engineers.

Canada Bacon Exports

Dominion Takes Fourth Place In Shipments To Britain

Ottawa, Ont.—Canada climbed during May into fourth place as a contributor to the British bacon market. Hon. H. Stevens, minister of trade and commerce, said in that month the Dominion delivered 5,556,400 pounds.

"The countries with higher contributions were Denmark, Holland and Poland. In May, 1932, Canada stood sixth with 2,814,224 pounds and in May, 1931, eighth with 254,974 pounds, coming far behind Denmark, Netherlands, Sweden, Poland, United States, Irish Free State and Lithuania."

Island Disappears

Tokyo, Japan.—Ganges Island, shown on maps of the Pacific east of 160.7 degrees north and 154.9 degrees east longitude, has disappeared, according to Japanese naval surveys who have just completed an extensive hydrographic cruise.

U.S. Wheat Tax

Washington.—Administrators of the United States Farm Act plan to levy a 30-cent a bushel processing tax on wheat, despite the recent sharp rise in grain prices. The administrators hope to pass the levy into effect early next month, probably July 8.

Believe France May Soon Be Forced Off The Gold Standard

Paris, France.—Financial experts said that the battle of the franc is lost and it is only a question of time until France will be obliged to devalue.

Telephone conversations between Premier Edouard Daladier and Finance Minister Georges Bonnet, who is at the London conference, are said to have revealed that hope has been abandoned of Great Britain's stabilizing with Europe.

Economic forces either will push France off gold or compel the cheapening of the franc, probably a fourth or a fifth, to meet U.S. dollar competition, financial experts said. "It is wiser to see now," declared a source conversant with the views

Relief From Drouth

Rains Over Wide Areas Greatly Relieve Situation

Ottawa, Ont.—At least temporary relief from drouth was provided over wide areas in the prairie provinces by rains during the past week. This was rendered more effective by moderate temperatures, according to the weekly telegraphic crop report issued by the Dominion Bureau of Statistics. The serious dangers from grasshoppers is emphasized.

"Drouth has had a damaging effect on the growth across the southern part of Canada from eastern Quebec to the Rockies. Heavy rainfall has greatly improved conditions in the Maritime provinces. Drouth prevails throughout Quebec, with growth of all crops retarded. Rain is urgently needed. Similar conditions prevail in Ontario, where the dry weather has adversely affected nearly all crops."

Grain producers in the prairie provinces are encountering many trials, particularly drouth, heat, hail, insects and disease. "oppers are becoming migratory, seriously threaten the crops over large southern areas of the three provinces.

Root-rot has accentuated the drouth in the past two weeks, where there were good rains in northern and central districts of the prairies which are now being overtaken by insects, but further general precipitation is necessary.

British Columbia reports are much more optimistic as a result of the rain, warm weather of the past fortnight.

Alberta Grasshopper Menace

Province Said To Be Facing A Serious Situation

Edmonton, Alberta.—As the result of a very serious situation which has arisen in the southern areas of this province in the past two weeks, owing to the very hot, dry spell of weather, the provincial department of agriculture is facing the most severe grasshopper fight in the history of the province. Hon. George Headley, Minister of Agriculture, said recently.

The higher statistics is much more serious than that which developed in 1922 which held the previous records in this campaign.

With plenty of poison bait materials on hand, the organization in charge of the campaign has the situation well in hand, in spite of the large area involved, and thus far the actual damage by the hoppers is comparatively small.

Army Of Workers

Ten Thousand Men Now Employed In Government Camps

Ottawa, Ont.—The number of single men now employed in government camps throughout Canada has reached 10,000, according to figures of the Department of Labor. These include those working under the direction of the Department of Defense. The number is steadily increasing as the various projects develop. The work of the national defense includes improvements of various militia camps, highway construction and landing fields for aeroplanes.

If parliament and the people were aware to the danger devaluation could be effected with less suffering, it was said, but the country is so thoroughly imbued with the idea of maintaining gold to make the franc safe that the government would be immediately overthrown if its value were changed now.

Mourn Treaty Of Versailles

Hitler Regime Responsible For Obsolescence Of Document

Berlin, Germany.—All Germany went into mourning June 28 in protest against the treaty of Versailles, signed 14 years ago by representatives of the allied powers and Germany.

The new regime of Chancellor Adolf Hitler, which moved toward complete domination of the national scene with the dissolution of the Nationalist party and its affiliates, is responsible for the first observance of the anniversary.

Plays were flown at half mast from churches, public buildings and homes. The signing of the post-war treaty was the theme of school exercises. Thousands of demonstrations were planned. The Berlin Protestant cathedral announced a special prayer service on the theme, "God liberate us."

All newspapers devoted editorial space to the treaty, which provided for changes in Germany's boundaries on the south, north and east; for the ceding of all Germany's overseas colonies to the principal allied powers; and for the limiting of Germany's military, naval and air forces among other matters.

Conference Of Ministers

Premier Told To Attend Meeting In Regina This Month

Victoria, B.C.—Premier Talmie will go to Regina July 20 to attend a conference of ministers of agriculture to discuss matters directly connected with agriculture in the four western provinces. The premier announced that he would attend the gathering as provincial minister of agriculture and would probably be accompanied by J. B. Munro, his deputy minister.

All matters concerning the dairy industry will be thoroughly discussed. Items on the agenda will be a report from Manitoba concerning the control of milk sales, creation of tuberculosis-free areas and general marketing problems. While in Regina the premier will attend the World's Grain Congress.

Had Narrow Escape

Boy Almost Buried In Blast By Running Wheel

Quinston, Sask.—Drawn into the path by the suction created by the running wheel, Gordon Currie, son of Robert Currie, wheel pool buyer here, narrowly escaped death, and endangered the life of his father.

On the face of the boy was showing in the stream of running wheel. Mr. Currie and Mr. Matthews, Northern elevator operator, managed to grasp hold of him and pull him from the bin. Mr. Currie, thinking to his arm pits in his efforts to pull his son out, had difficulty in getting out himself.

Although hurt when released and almost unconscious from lack of air, the boy recovered shortly after.

On Rotary Directorate

Edmonton, B.C.—A crowd of about 150 men broke into the unemployment relief office at Hamilton Hall, overturned registration files, tore out telephone connections, and fled before police could reach the scene. Practically all records of single unemployed relief cases were scrambled so that several days will be required to sort them out.

SUCCEEDS MCARDIE

Mr. Justice Atkinson, the new Judge of the King's Bench Division, who succeeds the late Mr. Justice MacCardie, England's famous bachelor judge, who committed suicide recently.

U.S. Has Small Crop

Predict The Smallest Crop In A Generation

Washington.—In the first official appraisal of recent crop damage in U.S. the Bureau of Agricultural Economics forecast the smallest crop of small grains—wheat, oats, rye, barley and flax seed that has been harvested in the country "in a generation." In another announcement, it attributed the recent rising wheat prices "largely to dollar depreciation in foreign exchanges," asserting that despite crop damage, "the domestic market is still burdened by a very large carryover and the world market price is still at a very low level."

It is estimated the world carryover as of July 1 would be approximately 6,000,000 bushels larger than last year, which would be a new record. It set the U.S. carryover at approximately the same figure as last year, 25,000,000 bushels. The bureau said drouth and other weather damage had reduced the wheat crop to be harvested this year below estimated domestic needs which ordinarily are from 600,000,000 bushels to 650,000,000 bushels, including human food, livestock and poultry feed and about 75,000,000 bushels for seed.

Despite the outlook for a crop of wheat below domestic needs—which would be the first this century—the bureau asserted the new crop together with the domestic carryover will probably provide a surplus for export.

Canda, Our—Vanderbilt's Memorial

Ottawa, Ont.—Canada's national war memorial is being altered in accordance with suggestions of the Prime Minister. The memorial stood in Hyde Park, London, England, almost a year but has been taken to the March Bazaar studio for change. When completed the memorial will be brought to Ottawa, although a site has yet to be definitely selected.

Unemployed Make Trouble

Vancouver, B.C.—A crowd of about 150 men broke into the unemployment relief office at Hamilton Hall, overturned registration files, tore out telephone connections, and fled before police could reach the scene. Practically all records of single unemployed relief cases were scrambled so that several days will be required to sort them out.

PUTTING THEIR HEADS TOGETHER

The camera caught Premier Ramsay MacDonald (left) and Lord Curzon, United States Secretary of State (right) in this unusual tête-à-tête pose during a dinner for the delegates at Grosvenor House recently. Apparently the gentlemen are exchanging views "off the record." Premier MacDonald is Chairman of the World Economic Conference and Mr. Hull is the chief delegate from the United States.

United States' Action Is Necessary To Save Conference Breakdown

Gold Standard Debate

Rise In Commodity Prices In More Encouraging Factor

London, Eng.—While the forces are gathering behind the scenes of the world economic conference for a renewed struggle over the gold standard, a new spirit is entering world trade.

Continued rise in commodity prices gives impetus to the belief the tide has turned at last. Dollar wheat at London with reports of small crops, both in Canada and United States, eased the situation which a setback in negotiations to limit production had made increasingly difficult.

For some days increasing pressure has been brought to bear on the United Kingdom's delegation to link standing with the gold countries and stabilize within the American dollar, which the United States flatly refuses to stabilize at this time for fear of the effects on their internal price-stabilizing program.

The British have stoutly resisted this proposal on the double ground that it would be unwise to do so until the U.S. was ready to stabilize, and until they know what is going to happen to the up-pepped American dollar.

Recently it was made known in high quarters that the British had absolutely refused to commit themselves to the new European gold bloc scheme. It was described in responsible British quarters as an effort to force the British and the United States so they would be unable deal independently of the gold countries on stabilization.

Great Britain therefore is sitting tight, keeping her hands free so she can deal directly with the United States on stabilization.

Renewed Confidence

Advances In Commodity Prices Is Augury Of Better Times

Calgary, Alberta.—Recent advances in commodity prices were laid by Premier J. R. Brownlee of Alberta to the renewed confidence of salaried men and women in the security of their jobs.

In Calgary attending the annual convention of the Union of Alberta Municipalities, the premier took time to express confidence in the early return of better economic conditions which he said was already evident.

"Thousands of our Canadian people are on salaries. When they lose confidence they do not spend freely. When they are confident, they do spend. I see the reserves which have been laid back in recent years by the salaried people are now beginning to open and that this influence will be felt throughout the Dominion for the better," he said.

Explaining a reference to a construction program, Mr. Brownlee said the government was now conducting a survey of useful public works which might be done in the province.

"The whole question of work which the government is now considering will be to increase accommodation in various provincial institutions," he said. "If we can find the money, each work may just provide the impetus needed to open up business again in the west."

Baldwin In Defense Of The Government Policy In India

London, Eng.—Die-hard Conservatives met overwhelming defeat in their attack on the government's Indian policy at a specially convened meeting of the central Conservative conference of more than 1,000 members attended.

Led by Winston Churchill, Lord Carson and Lord Lloyd, former governor of Bombay, the die-hard faction presented a resolution expressing "grave anxiety" over the administration's proposals for the government of India, but this met with a stormy reception. An amendment was finally adopted by a vote of 838 to 100, and an final criticism on the question until the joint select committee on India made its recommendations.

Stanley Baldwin, lord president of the council, defended the govern-

ment's proposals. He was given a great reception. Some time ago it was the government's official stance his leadership of the party on the verdict of the gathering and his decision to participate invested the meeting with first-class importance.

He alluded to his reluctance to bring great Imperial issue into the party arena, but emphasized that regardless of rumors to the contrary the white paper issued by government and embodying its plans for India, had the support of the entire cabinet.

Winston Churchill, who accused Mr. Baldwin of inconsistency, was subjected to considerable interruption while Lord Carson, leaving heavily in his stick and evidently in pain, was given a wonderful reception.

The British and the representatives of the gold bloc decided to appeal to Washington for assistance in overcoming the stabilization problem.

The British compromise had been offered to the monetary stabilization by France, which demanded currency stabilization as the price of their membership in the conference.

The compromise scheme was understood to be an attempt to reconcile the conflicting policies of countries of the gold and silver blocs which had denied that standard. The plan was said to offer a measure of support to the gold countries which the British feel sufficient to overcome the crisis.

George Bonnet, Finance Minister of France, is understood to have written a formal letter to Neville Chamberlain, Chancellor of the Exchequer, and head of the British delegation, stating the French delegates do not see any logical purpose in continuing the world conference in session unless "safeguards of a monetary order" are taken.

Wast France and the other gold countries—Holland, Belgium and Switzerland—want is a formal statement from the Prime Minister Ramsay MacDonald, as president of the conference, that he would view further departures from gold with apprehension.

This is the second time the gold nations have threatened the life of the Economic Conference and membership of the blocs. They were fully aware that the conference was facing its gravest crisis.

An American delegation, while still insisting that the stabilization problem was outside their province and was an administrative matter to be dealt with by Washington, were compelled by the situation to give serious consideration to the question.

Routine conference work was disrupted overnight without private stabilization conferences were being held.

Decides Not To Resign

Winnipeg, Man.—Hon. Albert Fertman, former minister of agriculture in the Manitoba Government and at present without portfolio, has decided not to resign his seat in the legislature or his position in the government.

Fatally Injured

Rosser, Man.—Theodore Kiffmeyer, 26-year-old farmhand, was fatally injured when attacked by an infuriated bull on his employer's farm near here.

Science Invades The Laundry

National Research Council Salvages Knotty Problems

Science has invaded the laundry. No more holes in the guest room sheets, no more raggedy towels, no more soiled collars, no washed-out colors. The national research council has harnessed science to the laundry.

The Eastern Canadian Laundry Men's Association are to hold a convention in Toronto and will be informed that by the application of science to their laundries they can cut \$100,000 a year from the nation's laundry bill.

Leaders in the industry some time ago told the national research council their troubles. Here a tablecloth came out of the laundry full of holes; there a bunch of colored towels came out with that washed-out complexion, stained shirt collars and cuffs resulted from clear cleans except under drastic methods that would damage the fabric.

What could be done about it? The research council investigated a textile and laundry branch. In it was found, not a modern Mrs. Gump or even a laundry dame, but a scientist, Dr. O. M. Morgan.

In a miniature dryer cabinet small squares of linen were hung surrounded by instruments and gauges.

In all manufacturing and sulphur dioxide from the smoking factory chimneys pollutes the air. Absorbed by wet fabrics, this gas is converted into sulphuric acid, which the housewife wonders how on earth those holes came in her good linen tablecloth and shirts.

Dr. Morgan's cabinet is giving the sulphur dioxide treatment to his little fabric squares, and then he'll know just what does really happen.

The laundering of fabrics wears them out far more quickly than actual wear and tear, and the laundries of Canada have for years been cutting this loss to a minimum.

One laundry refuses to believe the evidence. It has been washing clothes for years and years and its customers had seldom complained. They did not feel called on to change. As a concession they agreed to make one improvement suggested by the laboratory. To their amazement their tensile strength losses were cut in half. They not only put into effect all the other recommendations, but they sent their own experts to Ottawa to learn more about laundries.

"Do they bring their practical problems to you?" Dr. Morgan, the young Ontario-born scientist who is doing these wonders, was asked.

"Yes," he replied, "a well-known club claimed that a laundry had damaged a large quantity of table linen. Our tests showed the damage due to faulty washing, and the linen manufacturer made a handsome adjustment to the club and the laundry's reputation was cleared."

Doctor Has New Idea
Suggests Skin Irritants Or Foods May Cause Itchy

An experiment to discover whether "sensitization" of the nervous system to dust, medical drugs, or even the wrong kind of food plays any part in producing pruritic conditions that lead to crime is being made with 50 inmates of King Sing prison. Dr. V. C. Brahan, deputy commissioner of correction, relies on skin tests to show whether the individual is affected by certain kinds of dust, pollen, drugs, or foods to the extent that he may become "unstable." In this state he is restless, and in some cases may commit impulsive acts, Dr. Brahan has found.

King Must Give Approval
Variety artists who appear before the King and Queen are chosen at a secret meeting in London at which a provisional program for the ceremonial performance is drawn up. This is sent to the Lord Chamberlain, the Earl of Cromer, who in turn submits it to the King. Every item must have the approval of the King, and until this has been made known the names of the artists chosen are kept secret.

Decide Against Sweets
The Newfoundland Government has decided against participating in investigations for revenue-raising purposes. Several proposals submitted in the last few months have been rejected, according to a government announcement. The stand of the government is that promoters of sweets must deal directly with the Lotteries Licensing Board.

Turkey has ordered \$5,800,000 worth of German railway material.

New Tuberculosis Treatment

Hot Baths and Electrical Treatment Show Good Results

Possibility of the treatment of tuberculosis by use of hot baths and high frequency waves was presented before the American Sanatorium Association convention in Toronto, when Dr. E. S. Mariette, of Minneapolis, member of the committee on treatment, described experiments he had conducted in this field.

A majority of a number of patients who had undergone the hot bath or high frequency treatments, and a brief report had shown marked improvement, he said. Of seven who had taken hot baths over a month, six had shown X-ray improvements in some cases marked, and on three who had been given high frequency treatments two had shown improvement. All of the patients had been in sanatoria for years without showing any improvement whatever.

"I am not advocating this as an accepted treatment," Dr. Mariette emphasized. "But I am offering it to you as an idea and I would like you to try it. Time alone will tell whether or this is a step toward in therapy tuberculosis, or that we are all crazy."

His paper was received as a sensation by the association. His experiments, he explained, had been prompted by the noticeable reaction of animals, fowl and men, and their respective susceptibility to human and bovine tuberculosis bacilli.

Seven patients were subjected to hot baths which raised their temperatures to 104.5 for an hour each day for 10 days, he said. For the next two weeks he underwent the baths every other day. At the end of the period six showed improvement.

Spirit of British People

Britain Farther Along the Road To Normalcy Than Any Other Country

Of all the nations that participated in the Great War, none had a greater load to carry both during and after the conflict than Great Britain. Then came the economic collapse, the burden of debts which weighed her down Britain is farther back along the road to normalcy than is any other country. Admittedly, she is fundamentally the strongest. Economists will not find the explanation of this in columns of figures and charts and graphs. The reason lies in the spirit of the British people—Hamilton Spectator.

Automobile Accidents

Fewer Fatal Accidents In 1932 According To Statistics

There were 1,111 deaths from automobile accidents in Canada during 1932, as against 1,316 in 1931, says a report of the Dominion Bureau of Statistics.

The death rate from this cause was 10.6 per 100,000 population, as compared with 12.1 in the preceding year. Since the year 1928, the first for which the vital statistics of all provinces of Canada were compiled on this basis, 1932 was the first year to show any significant reduction in the number of deaths from automobile accidents. The years 1927, 1928 and 1929 each showed a marked increase over the preceding year, while the level reached in 1929 was approximately maintained in 1930 and 1931.

Reformation Policy

Proposals For Plans Covering Long Period Of Years Advocated For Saskatchewan

A policy of reformation and utilization of certain forest products is advocated for Saskatchewan by Hon. J. F. Bryant, K.C., Minister of Public Works of the province. Definite proposals for a reformation covering a period of 60 to 75 years are outlined by the Minister, who also stresses the feasibility of establishing a large croseeding plant at Prince Albert for the treatment of jack pine and lodge pole pine. Mr. Bryant suggests the adoption of a policy modeled after the English forestry plan, which would extend over a period of years, and that trees be planted in all areas suitable for their growth.

Prefers English Films

The Canadian people prefer English musical comedies to Hollywood sex and gangster films, says F. S. Revel, Canadian representative of the British International Pictures, who declares further that improved photography, the English accent, and wider acquaintance with British stars is creating a Canadian preference for English films.

World's Largest Libraries

The seven largest libraries in the world, according to numbers of volumes are: The Public Library of Leinster; Library of Congress, Washington; Bibliotheque Nationale, Paris; New York Public Library; British Museum; Berlin; and the Bodleian Library, Oxford.

Not Resigned

Refusing to acknowledge John Cabot, ancient explorer, as discoverer of North America or even this part of the continent, the city of Montreal has rejected the proposed inscription on a monument to the mariner the Italian colony of the city will present to Montreal.

Soviet Shipments of Gasoline

From Black Sea ports in the first three months of this year totaled 3,555,000 barrels.

MEET "PETER" and "PUNCH" THE HORSE HEROES

Here we see "Peter" and "Punch," the two famous R.A.S.C. grey horses, as they appeared at Olympia, London, recently. These two horses took part in the retreat from Mons and were awarded the three medals of the Great War. Now, too old to work, they are semi-retired members of the Royal Army Service Corps at Aldershot, and are kept by officers and men out of their own pockets.

The Foreign Born

Making a Great Contribution To Artistic Development Of The West

While there is sometimes a tendency to criticize the central Europeans in Canada, there can be no doubt that they are making a great contribution to the artistic development of the west, declared Prof. A. Collingwood, of the University of Saskatchewan, before sailing for England on the liner Calgaria.

Professor Collingwood was invited to occupy the newly created chair of music at the University of Saskatchewan a few years ago after he had acted as adjudicator at musical festivals in western Canada.

"Today, I am an ultra Canadian," he continued, "I am intensely proud of the wonderful development in music in western Canada. We have fully equipped orchestras in Saskatoon, Regina, Calgary, Edmonton and, of course, in Vancouver. The general standard of music in the west is comparable with that produced anywhere in the world."

Careful Use Essential

Substance Used In Explosives and Dyes Makes Fat People

Diatriphenol, a substance used in making explosives and dyes, also will make fat persons thin. Dr. M. L. Painter, medical professor from Stanford University, told the Pacific Division of the American Association for the Advancement of Science here.

But he warned women not to storm the drug stores, for improperly administered diatriphenol in a short time will kill them with a fever of 110 to 115 degrees. In proper doses, though, he said, it melts fat as fast as it forms.

Lucky Parachute Jumper

James Horning, professional parachute jumper, of Jolip, New York State, narrowly escaped death, three times in one week. In two jumps—only an hour apart, he was rescued from the waters of Great South Bay by a police boat, and suffered possible injuries when his chute collapsed a hundred feet above the ground. The third time he landed on high tension wires, and was saved by firemen.

A man wrapped up in himself makes a very small package.

Life On Board Old Ship

Eighty Men From Crew Of Old Frigate, Recently Restored

No stranger crew sailed the *Seven Seas* today than that of the U.S.S. Constitution. Eighty men went aboard the restored frigate in June, 1931, to undertake an extensive strange to them. Everything about "Old Ironsides" is the same today as in 1812, including the routine of the crew. The work is all done by hand; even the decks are scrubbed with water pumped from the sea. The only heat is in the galley. Yet the crew, after nearly two years, is reported almost intact. Quite a record, in view of the pleasant duty to be had on the up-to-date man-o'-war.—Boston Post.

The fresh-water reefs of British rivers are in the depths of the Atlantic off Bermuda. After the eggs are hatched it takes the young eels three years to cross the Atlantic to Britain.

Advertise it, or you may have to keep it.

FANCIFUL FABLES

THE HINDU FAKIR, HE DECIDES TO GO FISHING, HE DOES.

The big game hunter was telling his stay-at-home wife all about his encounter with the Bengal tiger and how he had finally shot it. "Yes," he wound up. "It was a case of the tiger or me."

"I'm so glad it was the tiger, dear," she said sweetly, "otherwise we wouldn't have this lovely rug."

Norway's whales produced 1,280,000 barrels of oil in the season just closed.

Seaside girls of England are wearing Japanese coolie hats this season.

W. N. U. 2001

Modern Science In Cooking

Trained Workers Preparing Standard Recipes For Best Results

One of the big contributions the scientists in home economics laboratories have been making to the home-maker is in the standardization of recipes.

Believing that a great deal of the uncertainty in cooking was due to uncertain measurements, trained people have been working with this problem. Now the accepted standard is that a cup means exactly two-twelfths of a pint, eight ounces, there are 16 tablespoons in a cup and three teaspoons in a tablespoon.

Trained workers have also been deciding exactly how much of each ingredient should go into a recipe to give not only a passable result but a first-class one.

The most recent efforts have been directed toward the combining of ingredients. It is hard to know when to beat and when to stir and how long, and precisely how to perform a large number of cookery tasks. Modern science is standardizing these important procedures.

Some Weather Indicators

Several Ways To Determine Whether Rain Is Coming

Look at your bedroom windows and, if there is no mistiness on the glass, but if the air is soft and warm, extremely unlikely. On the other hand, when the windows are misty with damp, the weather is not likely to be so warm.

Then examine the case of soap, for this will give a useful indication when the cake is dry expect a fair day, but if the case is soft and wet rain is sure to come.

When you come down to breakfast see what happens when you put a lump of sugar in your tea or coffee. If the air bubbles stay long on the surface, straddle the weather, for this means that there is a good deal of moisture in the air and rain is likely to come.

The atmospheric pressure is low, a condition associated with unsettled weather. On the other hand, if the bubbles rise soon you can tell that the air is very dry and that there is a high pressure system in existence, both of which indicate fine weather.

More Than a Coincidence

Birth Of Twins Occur In Three Generations Of Ontario Family

Once in a family might be just an occurrence; twice might be a coincidence; but when for a third time the same family produces twins, it is a coincidence, it would seem the stark and hereditary are inexplicably tied together.

Mr. and Mrs. Amos Weber, Jr. of Waterloo, Ont., recently became the parents of twin sons. These came after a family history of twins.

Years ago Mr. and Mrs. Amos Weber, Sr. had seven children, one of whom was a twin. One of their sons, Mr. Martin, had seven children, one of whom was a twin.

It must be a record.

Decide For Yourself

A surgeon, an architect, and a politician disputed which belonged to the order of precedence.

The surgeon claimed the distinction because Eve was made from Adam's rib. That, he contended, was surgery.

"Admitted," said the politician, "but who created the case?"

Mysterious Expedition

Capt. J. Bartlett, explorer, has a secret rendezvous with adventure in the land where the north wind comes from. Leaving for the Arctic in his famous schooner "Ella M. Morris," he refused to say exactly where his party is going. "We hoped to penetrate an area about which virtually nothing is known," he said mysteriously.

Tiger Preferred

The big game hunter was telling his stay-at-home wife all about his encounter with the Bengal tiger and how he had finally shot it. "Yes," he wound up. "It was a case of the tiger or me."

"I'm so glad it was the tiger, dear," she said sweetly, "otherwise we wouldn't have this lovely rug."

Norway's whales produced 1,280,000 barrels of oil in the season just closed.

Seaside girls of England are wearing Japanese coolie hats this season.

W. N. U. 2001

Lord Strathcona's Home

Is Now Haven For Aged Ladies In Reduced Circumstances

On the door of one of the most stately mansions in Montreal there is a sign which reads: "My Mother's Home." It is a tribute to a Canadian mother, who has long since passed away, by a sign which attests to the riches and power from the humblest beginnings. There are few more picturesque figures in Canadian history than the woman who had this home built.

Donald Alexander Smith, who came to this country as a junior clerk in the Hudson Bay Company from Fort, in Scotland, and rose to become governor and chief commissioner of that rich and powerful organization with numerous powers over a vast territory than many kings have enjoyed. Later he wielded a strong influence in the Canadian Parliament and was a great asset to the government. Commissioner in London for Canada. Honors were showered upon him by universities both in Canada and in Britain.

His home, which was built by his association conferred upon him the highest posts in their gift. Queen Victoria elevated him to the peerage as Baron Strathcona and Mount Royal of Glencoe in the County of Argyle and of Montreal, Canada. The guest book of his home reads almost exclusively of the British people, as well as being a record of the names of the hundreds of men of eminence in all activities who came to Canada. The present King and Queen Mary spent several weeks there. Eight dukes and seven marquesses, and a great many other names of twenty-one earls and six viscounts are recorded as visitors.

These were members of the British nobility in your time, and they were the distinguished guests of visitors. Six governors-general of Canada and twenty-six lieutenant-governors were entertained in this palatial home of Canada's Grand Old Man, as well as archbishops, and bishops, generals and admirals, judges and men of wealth.

As a change from regarding the need of a building in which gentlemen in reduced circumstances might find a haven of rest, the garden of the house, the seed sown in the fertile soil of the kind heart of its founder. And now this great group of palatial dwellings, with their furniture and rugs just as Lord Strathcona left them, has been converted by Lord Atholstan into a magnificent sanctuary.

Praise For Canadians

Earl Of Bessborough Has High Opinion Of People's Courage

"I have only seen Canada in a time of depression," His Excellency the Earl of Bessborough, told an audience at the closing exercises of the Boy's Farm and Training School at Shawbridge, Que. "Having seen the Dominion during this period," the Governor-General continued, "I think I have learned to appreciate Canadians far more than I would have been able to do in a time of general prosperity. There is nothing more encouraging, hopeful, or cheering than the calm, steady way Canadians have pursued their daily lives through this difficult period with a supreme faith in the destiny of their country."

Should Have Objected

Mr. Richards was persuaded to buy a parrot that could jabber in several languages. He ordered it sent home.

The same day his wife ordered a chicken for dinner. On leaving she said to the cook, "Mary, there's a bird coming for dinner today. It's cooked for Mr. Richards when he gets home."

The parrot arrived first, and Mary followed instructions. Dinner was served.

"What's this?" exclaimed Mr. Richards.

"Mary told him."

"But, for goodness sake, Mary," he said, "this is awful! That bird could speak in three languages."

"Then why the dickens didn't he say nothing?" asked Mary.

Had Nothing On Him

A woman hired a taxicab. The door of the cab was hardly closed before the engine started with a jerk, and the driver began to lurch forward, narrowly missing lamp posts, tramcars, policemen, etc. Becoming frightened, the woman remonstrated with the chauffeur.

"Please be careful. This is the first time I ever rode in a taxi."

"That's all right, madame. This is the first time I ever drove one."

CHAPTER XIII—Continued

"But sir," he led on, "when I came here from the Algonquin patrol, he wouldn't cooperate with me then. He didn't seem much interested. I don't think, in getting those bandits."

"Not much interested?" Haskell echoed, with a great show of astonishment. "Sir, I wanted him to make a patrol to the Inconnu River. But he was in a temper. He wouldn't even listen to my suggestion."

A wild elation surged through Alan. One more step and Haskell was bound! He fought down his elation and fidgeted uneasily in his chair.

William bowed down on his hand. "Baker, answer that charge! Haskell suggested a patrol to the Inconnu. In my opinion that was a splendid suggestion. It was almost the only hope of capturing these criminals. You wouldn't listen to him. Now, then, can you assert you were forced to buy out?"

"He didn't," it wasn't him that made that suggestion, Alan stammered weakly. "I think—I believe I made that suggestion myself. But he wouldn't let me go."

"That's a lie!" Haskell pounced upon him. "I suggested it. I begged him to make that patrol."

Alan looked at Haskell. He suggested that Inconnu patrol? It was your idea?"

Haskell nodded. "I did. Whipple can witness it." He was smiling openly in triumph.

All Alan's hesitation dropped away from him. There was a longer and more to disintegrate. He turned to Williamson. "You heard him. You heard what he said. He told you he suggested that Inconnu patrol. He just repeated it and said Whipple was witness. Don't let him back out of it now."

"I don't have to back out of anything," Haskell snapped. He was staring in sudden uneasiness at Baker.

"Yes, I heard him," Williamson answered. "What about it?"

Alan rose slowly to his feet, pulling himself up to his full height and powerful height. In that moment when he realized Haskell was caught in the deadly trap, his mind whirled back to the Inconnu River.

Joyce's room where he had lain through weary hours of doubt and pain, and where he had had carefree, plotted this trap. He felt wordless tender gratitude to Joyce; this stratagem was hers more than his; her quick brain had been the first to see its crushing possibilities.

"Inspector, you say you asked me to lead that Inconnu detail. You say you suggested it. You say it occurred to you that the bandits would escape by that river. I say you are a liar! I propose to prove you're a liar."

for STIFFNESS!
Pain of MINARD'S

INJURY

W. N. U. 2001

He paused a moment, then raised his right hand and pointed at the wall chart behind Haskell's desk. "The Inconnu River is not shown on that map of yours, inspector. You tried to find out from that Indian, Little Otter, where the river is. You didn't know. You don't know now. How could you suggest sending a patrol to a river when you have a slight knowledge of its location? A step up there to that chart, you, and show us the Inconnu!"

Haskell sprang to his feet, snarling at Alan. "I don't like orders from you!" He was fighting like a trapped wolf. His panic, his livid face, betrayed him.

"Then consider it an order from me!" Williamson commanded. "Show me where the Inconnu is!"

Haskell did not stir. His impregnable defense had crumbled in one spot; the sea was rushing in upon him.

He heard Williamson thundering: "Little Otter, where the river is. You didn't know. You don't know now. How could you suggest sending a patrol to a river that you know nothing about?"

Haskell did not answer. Caught, trapped, he had gone too far, he had overplayed. . . . He heard Larry Young's savage mocking laugh; heard Bill Hardcock chuckling.

"Tried to steal Alan's thunder, and get struck by it!" . . . Williamson's angry erect figure became a blur. . . . Across the desk he saw Alan Baker's face in a sort of haze, not smiling at him, not mocking, but hard, pitiless.

"The man had beaten him, had taken away the girl he loved—this man whom he hated so fiercely that once he had tried to kill him.

Out of the haze he heard Baker's voice: "What's the matter?" . . . Something snapped within, and that vestige of self-control was swept away. A madened anger shook him, blinded him. In a fury he suddenly drew back and swung and smashed a fist against that hated face, as though trying to blot it out.

The blow unsteeled Baker for a moment. He stepped back, Williamson tried to interpose. Bill sprang up and leaped across the room to jump between them. But Haskell had swung again. Alan flung up his left arm to protect himself. A grimace of pain jagged across his face as the blow fell upon his wound. He did not step away that time. . . . For an instant his eyes measured distance.

"A right arm swung back, and his hand felt against Haskell under the jaw, a single smashing blow that dazed him and sent him reeling toward the wall."

When Bill and Pedemast helped Haskell to his chair and he sat down, groggy and white of face, Williamson bade the two.

"Take Constable Young and get out, Baker, stay here; I want you here."

Vaguely Haskell realized that the superintendent was ordering the men away so that they might not witness the humiliation of an officer. He had lost the advantage had crashed down upon him. Baker had come triumphant through this hour.

But in those moments of his crushing defeat, while Williamson was trying to get the men out of the cabin, Haskell felt the first small breath of a strange relief, like a cool wind that blows through a hot place.

He had been involved in; had been sucked deeper and deeper into a morass of falsehoods and perjury. He was free of all that now. In these last weeks there had been times—when he looked upon Larry Young, when he thought of Baker's great-hearted adventure.

When the news came that Dave MacMillan's suicide—that his conscience had revolted and he had loathed himself. He felt as though by making a clean breast of everything to Williamson, he would be coming out of a dark and noxious place into the sunlight.

The only aching madness to disturb Elizabeth Spaulding would not, but rose to torture him.

CHAPTER XIII

By the Lightning Flash

At Alan's cabin late that evening, Bill was sitting on the edge of the cot, head in hands, plunged into desolate thoughts. He had caught blue funk that he neither heard nor talked what Alan and Buzzard were talking about.

At hour ago, by sheer accident, he had discovered that he himself was now officially in charge here at Ennada.

William,

Alan had the entire news, Haskell, you'd go out of the Mounted faster than you came in. You're suspended; Hardcock will be given command; the line of business in which you were engaged, he had caught a few angry sentences from Williamson.

You'd go out of the Mounted faster than you came in. You're suspended; Hardcock will be given command; the line of business in which you were engaged, he had caught a few angry sentences from Williamson.

You don't deserve a chance to walk straight, but I'll give you one rather than kick you a row over your head. There's a line has detachment down on the border that's about your fit. I'm going to

transfer you there, and I'll try not to laugh when I see me saluting you." To be in command Haskell's desk was meant as small solace to Bill. It simply meant more work, more responsibility, without Alan's judgment and leadership to lean on.

In the shift of light streaming from the cabin door a girl's figure appeared. Bill straightened up suddenly, recognizing Elizabeth. Always a bit afraid of the supercilious girl, Bill had no desire to linger and find out her trouble. Nudging Buzzard, he

"She wants to talk with Alan. We'd better get out."

As Elizabeth came across to the library room in the full candle glow, Alan saw she was angry, and instantly guessed the cause of it. She had heard

With no word about his long patrol or the wounds he had brought away from it, Elizabeth demanded:

"Is it true—what I heard—that that reward money? You're not going to accept any of it?"

Alan was shocked that in her first breath she should speak of money. He said rather tersely:

"That's not altogether true. I'm taking enough to pay the MacMillan trading post for Larry, and I have to pay for those things Buzzard and I stole in Edmonton. But I'm not keeping any of it otherwise."

"Are you crazy—to throw away more than you've made in all the years you've been stationed here on this backwater? Why did you go on that patrol and waste all these weeks?"

"Good Lord, have you been thinking I did it for the money? Is money the only thing in the world you ever think about?" He tried to curb his anger and speak politely. "Elizabeth, your brother Curt went on a patrol, he gave his very life, because—because You may not understand why. But God knows it wasn't for money."

"Then you intend to throw away ten thousand dollars?"

"If you want to put it like that, yes, I couldn't associate with myself if I'd accept one cent of it."

In silence they looked at one another. Elizabeth angry and accusing. Alan firm, unyielding. After a moment, realizing she had run up against granite in Alan Baker on this question, she turned to another.

"There's something else I want an understanding about. Mrs. Drummond told you intend to take care of Jim Montgomery's girl. What makes you feel you're responsible? Why on earth Just because you were acquainted with that child's father?"

Alan sharply interrupted her. "Elizabeth, let me point out something to you. It may be cruel and generous of me, but it's gotten to be. When Curt was taken, I felt it was my duty to look out for you. You were a grown woman; you had chances of employment; you had other advantages. But I assumed responsibility."

"You're a coward," she threw it up to you; "I'd be free and wouldn't do more if I'd been allowed."

Wood Sugar

Production on Large Scale in Sweden Is Planned

Raw sugar made from wood has been planned for production on a large scale in Sweden. This sugar, however, is not for human consumption, but for use as feed for cattle, for alcohol distillation and also as a material for making yeast.

Wood sugar is a timely source of alcohol, as Swedish laws make it compulsory that all imported gasoline for use in motor cars be mixed with alcohol in the proportion of three to one. A new discovery has been made said to make it possible to extract about 60 pounds of sugar from 100 pounds of wood. Swedish authorities report that one million long tons of this sugar can be made yearly in that country.

Playing Safe

"What is your opinion of the tariff?"

"It's a great question," replied Senator Borah, "on which I do not permit myself personal views. My public opinions are regulated largely by the lines of business in which the most influential constituents have to be engaged."

New trains to run 110 miles an hour are being planned for United States railroads. That should keep the "Let's beat it to the crossing" fans.

A new process of extracting copper from its ores by means of fumes has been developed by chemists in Chile.

Oxford Group Platform

Independent Candidate Announces Policy Of Absolute Temperance

Hugh Savage, independent candidate for the legislature in Cowichan-Newcastle, B.C., announced at the nominating convention at Duncan his Oxford group platform of "absolute temperance, absolute purity, absolute truth, absolute love."

Mr. Savage is publisher of the Cowichan leader and a widely known newspaperman, and a supporter of the Oxford group movement. In his speech he told the convention:

"If you want to put me in you have got to know what sort of man I am. I have changed my mind. I have decided—I know—that the only remedy for this depression will come by the individual altering his views. It is no use changing the government unless we change ourselves."

"My party, by its motto, is pledged to religion, liberty and law. I want you to vote for me for a think of that."

Mr. Savage pledged himself to fight "this accursed patronage that robs even the poor people on the roads today how to the foreman for fear of their job."

Britain Buys Empire Wheat

Imports Into United Kingdom Show Heavy Increase

During the 12 months ending May, compared with the previous 12 months, the imports of wheat into the United Kingdom from empire countries showed an increase of 52 per cent, says a report of the Dominion Bureau of Statistics.

The increase from Canada was about 40 per cent, from Australia 17 per cent. Of the total imports of wheat into the United Kingdom for the 12 months ending April, Canada supplied 48 per cent, at an average of 25.67 per cent, while for the same period in 1932, Canada furnished 14.88 per cent, and Australia 19.8 per cent.

An Aerial Train

Three Motorless Planes Successfully Hauled By One Motorized Craft

Three motorless aeroplanes were hauled about the sky at Los Angeles by a fourth plane, acting as "locomotive."

This is understood to be the first instance in aerial history in the United States in which as many as three trailers have been towed simultaneously by one motorized craft.

The demonstration was reported as a step toward realization of the dreams of airmen—that of operating aerial express trains with only the engine and power car at the rear towed so they can be cut loose from the train at any landing field along a transport route.

Well-Known Artist

Horne Russell, Portrait Painter, Dies

In New Brunswick George Horne Russell, R.C.A., Montreal painter well known across the Dominion for his portrait work and barter scenes, is dead at St. Stephen, N.B. In 1909, after a painting trip in the Canadian Rockies, Mr. Russell was elected an associate of the Royal Canadian Academy of Art, becoming a full member in 1919 and president of the academy from 1922 to 1929.

Pretty Teacher (having written a sentence on the blackboard: "It's a month since I been to the cinema"): "Willie, what must I do to correct that?"

Willie: "Tell your young man, miss."

The government of Siam is boosting railway construction.

"NOW I FEEL FULL OF PEP"

Food From Many Countries

Delegates To World Economic Conference Have Special Restaurant

Between the plenary session speeches and the committee meetings, the delegates to the Economic Conference foregather in a special restaurant stocked with nearly all foods and liquors consumed in any part of the world.

There is much fraternizing as representatives of the various countries sample each other's favorite national foods—caviar, sandwiches and vodka, Chinese chicken, five kinds of German sausages, meat sauce from Japan and so on.

Beverages available run the entire range of wines, beers, whiskeys, gin brandsies and liqueurs from a dozen countries, including Arack from Palestine, which bar attendants describe as being "popular among those persons who try anything once."

One waitress boasts of an ability to say "anything" in 13 languages.

The delegates ride from their hotels to the Conference hall in big cars decorated with small national flags.

THE RHYMING OPTICIST

By ALICE MICHAEL

SANCTUARY

To cross your threshold is to gain A mood that waits me only there. To seek the shelter of its door To peace like that which follows prayer.

How sweet, to know that where you dwell No evil thing can find its way; That in your presence all is well, Serene and beautiful as day.

To cross your threshold is to find How futile are temptations ways; Your look, compassionate and kind, Can touch with light life's darkest days.

To cross your threshold is to leave Outside all bitterness and care; On sacred ground how can one grieve? What troubles can assail one there?

Your faith and trust God's own threads are. As strongly shining as the sun; With no dropped stitch of doubt to mar The fabric which your years have spun.

Grow Red Cotton

Cotton Plants in Southern States Have Turned Complexion

The old description of "fields of snowy white" does not hold good any more for cotton patches of south Mississippi have gone red and changed the complexion of the land.

Planters are growing red cotton now because some experts say the red variety has a longer staple and can resist weevil better than its green cousin.

The stalks and leaves are a deep red and the fields look like lakes of blood. The blooms are pink and the cotton itself, of course, is white. The contrast is startling.

Will Direct War Library

Ex-President Hoover To Be Librarian At Stanford University

Herbert Hoover is to become a librarian.

The Stanford University Library Building is being remodelled to provide Mr. Hoover an office from which he will direct the Hoover War Library.

Additional space in the archives will be provided to house additional material brought here from Washington by the former President.

The collection is the largest of its kind. Many documents filed there dealing with secret diplomatic negotiations preceding the World War.

After it never have been made public.

Millions In Charity

The millions of the late Horace H. Rackham, 73, who made his fortune as one of the original stockholders in the Ford Motor Co., are going to charity.

Rackham, at 45, borrowed \$5,000 to invest in stock of the Ford Company, and 10 years later sold out to the Fords for \$125,000,000.

Followed Instructions

The roadmaster, riding along on the road, sent a telegram to section foreman which read as follows: "Grass and weed accumulated around bridge 365-M. Burn."

In a short time the roadmaster received a telegram from the section foreman: "Bridge 365-M. burned."

A bill in the British House of Commons proposes flogging for those cruel to animals.

Cheam, England, recently held its 300th annual fair.

Little Helps For This Week

"Thou shalt rejoice before the Lord thy God in all that thou putteth thine hands to do."—Deuteronomy 12:18

"Be ye thankful in all things."—Colossians 3:15

Thou who hast given so much to me Give one thing more, a grateful heart; Not thankful when it pleases me, Thy joys blessings had more than I. But such a heart whose pulses may be Thy praise—G. Herbert.

If any one would tell you the shortest and surest way to all happiness and all perfection, he must tell you to make it a rule to yourself to thank and praise God for everything that happens to you. For it is certain that whatever seemingly calamity happens to you, if you thank God for it you may turn—into a blessing. So that therefore work miracles you could not do more for yourself than by this thankful spirit, for it heals with a word. It touches into happiness—William Law.

Fear Complex Is Bad

Demand Steps When People Are Afraid To Spend

With one-fifth of our working population unemployed, it is no longer possible to believe that jobs are part of the natural order of things. The result is that fear has become the dominant emotion of contemporary America—fear of losing one's job.

Employees today are satisfied to keep what they have; they are grateful for very little. This complex is bad for everyone. It degrades the employee and makes him an insensate automaton. It kills both ambition and desire. It debases standards of living. And from the employer's point of view it is equally disastrous.

Where there is no desire, there is no demand. People who are doing nothing by nothing—Atlantic Monthly.

Greater Business Activity

Bank Debts In May Reach Highest Point In Two Years

Reflecting greater speculative and business activity, financial transfers in the form of bank bills in May reached the highest point since November, 1931.

The May figures stood at \$2,949,600,000 compared with \$1,876,800,000 in the preceding month, a gain of 25 per cent, after seasonal adjustment.

The gain in business activity in Calgary and Medicine Hat, in addition to the marked increase in Winnipeg. The net result in the prairie provinces is a gain of 52.2 per cent. The gain in British Columbia was 67 per cent. Vancouver showing an increase of 4.8 per cent.

Left Small Estate

Mrs. Mary Ellen Smith, former British Columbia cabinet minister, the first woman in the British Empire to hold such a position, and much of whose work is written into social legislation in this province, left a gross estate of only \$520 it is revealed by an application in supreme court for probate. The net is \$330. Mrs. Smith died on May 3.

A Triple Tragedy

"Goodness gracious!" exclaimed his wife when she saw him, "and phew! have ye been at now, Pat?"

Pat groaned dimly. "O've had me now broken in three places," he replied, "alright, but I'm not home yet. I'll have to keep it up for some time."

Austria's drive against foreign fuel is helping its coal mines.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

No Calomel necessary
For you can get healthy again, without any more of that nasty Calomel.

It's your liver that makes you feel so wretched.

It's your liver that makes you feel so wretched.

It's your liver that makes you feel so wretched.
